

# Improve Personal Performance using Neuroscience at Ganga Anesthesia Refresher Course

**Baxter** invites you to their stall at the conference for experiencing **PRISM** Brain Mapping.

**PRISM** Brain Mapping is a unique behaviour profiling tool that has been developed in the UK and is based on applied neuroscience.

**PRISM** Brain Mapping is the world's most comprehensive, online, neuroscience-based behaviour mapping instrument, that uses the latest groundbreaking discoveries in neuroscience to help you understand how to harness the power of the brain, value talent & channel peak performance. We are delighted to offer you a sneak peak in to the same with **PRISM 4D**.

## **What you need to do:**

- 1) Visit the **Baxter stall** at Ganga Anesthesia Refresher Course from 26th - 28th June, 2015
- 2) Take a quick online inventory (not more than 5 minutes)
- 3) Ask for your tailor-made '4D Brain Map' and Handbook

We look forward to your presence at our stall for this interesting out of the box interaction.
