CLINICAL SKILLS AND INTERESTS

I am proficient at administering safe and quality anesthesia for a variety of surgical cases, including orthopedics & trauma, neurosurgery, urology, pediatric surgery, obstetrics & gynecology, transplant surgery, plastic and reconstructive surgeries, laparoscopies and ENT. I have always been interested in developing effective pain management systems for patients after surgery for optimal comfort. I have a special interest in ultrasound guided regional anesthesia and have used advanced blocks and continuous catheter techniques effectively especially for high risk and demanding procedures. I have helped organize workshops on ultrasound application and have been an invited speaker on this topic at national and international events. For over 12 years, I have made ultrasound in anesthesia, the essence of my clinical practice.
