

# Curriculum Vitae

Dr B. Sunita Rao

MD, FRCA

12<sup>th</sup> February 2022

I am an Anaesthetic Consultant with over ten years of experience in the field of anaesthetics, intensive care and pain management. The initial part of my career was in India where I pursued MD in Anaesthesiology from Maulana Azad Medical College, New Delhi. I trained in the UK from Warwickshire School of Anaesthesia and worked as an Anaesthetic Consultant at Northampton, UK and am currently working in Queensland, Australia.

I have a keen interest in airway skills, which I have further developed while pursuing an airway fellowship at University Hospital Coventry (UHCW). I have developed my teaching skills and management capabilities through active involvement in organising courses like Airway workshops at UHCW. Teaching and training have been a continuously evolving process and integral part of my career. I have been regularly teaching at national level airway courses for anaesthetists of all grades, ODPs and recovery staff through lectures and workshops. The national level exam courses for the Primary and Final FRCA at Coventry and Liverpool have enhanced my skills as an educator with a deep understanding of the examination process.
